

Innovating Minds, Shaping Futures

Get Certified in PYTHON PROGRAMMING

Explore the Hidden Features of Python & Be Industry Ready

- ✓ Certification of Python
- ✓ Membership of GetSetAI Community worth ₹999/-
- ✓ Tech Talks with Industry Professionals
- ✓ 50+ LeetCode & Real-World Problems
- ✓ End-to-End Project with AI/ML Integration

~~₹ 4999/-~~
Now only
₹1999

Who We Are ?

GetSetAI Innovations is officially registered under the **Ministry of Micro, Small & Medium Enterprises (MSME), Government of India**. We are a vibrant and student-driven tech community built with one vision — to bridge the gap between academic learning and real-world technology. At GetSetAI, we believe that innovation begins with curiosity, and curiosity thrives when learning becomes accessible, practical, and inspiring.

We are not just another online education platform — we are a **dynamic learning ecosystem** designed for students and young professionals who are passionate about technology. Our government-recognized program offers a **comprehensive all-in-one tech course** that includes **Python, Artificial Intelligence, Data Science, Machine Learning, Cloud Computing, and much more**, all delivered 100% online. Every module is structured to move beyond theory, empowering learners to gain **hands-on experience through real-world projects and challenges**.

Our mission is simple yet powerful — to make **industry-ready learning** affordable, engaging, and inclusive for everyone. Through **industry mentorship, live sessions, and collaborative projects**, we ensure that our learners not only understand technology but also know how to apply it creatively.

Beyond learning, **GetSetAI Innovations** is a thriving hub for innovation and community-driven growth. We regularly host **ideathons, hackathons, and tech talks**, creating a space where students can brainstorm, build, and showcase their creativity. Our initiatives are designed to **bridge the gap between students and the tech industry**, helping young minds gain exposure to real-world scenarios, tools, and professional networks.

We take pride in being a **movement for practical education**, where every learner transforms from a beginner to a confident innovator. At GetSetAI, we don't just teach technology — **we empower you to live it, build with it, and innovate through it**. Together, we are shaping the next generation of tech leaders, problem-solvers, and visionaries who are ready to redefine the future.

Launchpad

Hello World!

We're absolutely thrilled to see your interest in our platform. Dear future tech leader (yes, that's you!) — welcome to a journey where curiosity meets innovation. At GetSetAI, we're not just a course provider — we're a growing **community of learners, creators, and future tech innovators**. Our mission is simple yet powerful We're not a boring classroom. We're a community — of learners, dreamers, coders, creators. Our goal is To deliver everything a student or passionate learner truly needs — in a pocket-friendly and practical way.

What Makes Us Different?

We believe that learning should feel like living technology — not memorizing it. Here's what makes our course package truly powerful:

- 1. Government Recognized Certification** Earn a valuable certificate from Get Set AI — certified by MSME, Govt. of India.
- 2. All-In-One Tech Bundle** Python, AI, Data Science, Machine Learning, Cloud, GitHub — everything you need to rock the IT world.
- 3. Learn From Anywhere** This course is 100% online.
- 4. Quality? You'll Feel It!** You've probably seen some tech magic already. But after joining us, you'll live it.
- 5. Real-World Projects** Not just theory — you'll build real stuff. Cool stuff. Portfolio-worthy stuff.
- 6. Connect Across Borders** Collaborate with students from different states and countries — learn, network, grow.
- 7. Insights from Real IT Professionals** Get mentorship and guidance from people working in the industry across various domains.

8. Full Course Curriculum Check the next page for detailed subject breakdown — we've structured everything you need, nothing you don't.

No False Promises. No Fancy Jargon. Just Real Growth. We don't believe in promising job guarantees or fake placements. Why? Because we believe in creating job givers, not just job seekers. **We don't promise jobs.** We prepare you to create your own path. By the end of this course, you'll have skills, confidence, and clarity. You'll feel the power of tech right from your room. **And in a crowd of 1000 — you'll be the one who stands out.**

Final Words from the Creator “I assure you — from my heart to yours — that this journey will be worth it. You'll learn from me, and I'll also learn from you. Together, we'll grow. Together, we'll build a future where learning is limitless and technology is your superpower.”

Key Features

1. Weekly Talks with Industry Experts

Gain direct exposure to real-world challenges and solutions through weekly interactive sessions with AI professionals and industry mentors.

2. Exclusive GetSetAI Innovations Membership

Get instant job alerts, recruitment notifications, and tech updates from top companies through our official membership program.

3. Government-Recognized Certification

We're registered under **MSME, Government of India**. Receive a verified certification from **GetSetAI Innovations** to strengthen your résumé and stand out in interviews.

4. AI-Based Hands-On Training

Master essential tools and frameworks for **data science, machine learning, and analysis** with practical, project-oriented learning.

5. End-to-End Major Project Demonstration

Experience the full development cycle — from **model building to cloud deployment**. Learn MLOps, CI/CD pipelines, and real-time delivery workflows.

6. 50+ LeetCode Practice Challenges

Sharpen your problem-solving and logical reasoning skills with curated LeetCode problems aligned with real-world AI and data challenges.

7. Freelancing & Internship Opportunities

Perform well, and get a chance to work on **live AI projects, freelancing tasks, or internships** with ongoing mentorship support.

8. Startup & Innovation Sessions

Attend two dynamic sessions on **AI startups, innovation, and funding opportunities** — guiding you to turn ideas into successful ventures.

Why You Should Learn Python in 2025

1. AI & Machine Learning Friendly

Python is the **heart of Artificial Intelligence**. From TensorFlow to PyTorch, most modern AI and ML tools are built using Python — making it the #1 choice for future innovators.

2. Every Tech Field Uses Python

Whether it's **web development, automation, data analysis, or robotics**, Python has its footprint everywhere. Learning it opens doors to multiple career paths.

3. Huge & Supportive Community

With millions of developers worldwide, Python has a **massive community**. Whatever problem you face, there's already a tutorial, library, or solution available.

4. Start Your Own Software or Startup

Python allows you to **build your own applications, websites, and AI tools**. You can easily turn ideas into working products and even start your own tech venture.

5. Become a Mentor or Instructor

Once you master Python, you can **teach, mentor, or guide others**. It's not just a skill — it's an opportunity to inspire future coders and earn through teaching.

6. Pathway to AI & Data Science Expertise

Python is the **first step to becoming an AI/ML expert**. It's widely used in research, automation, and intelligent system development.

7. Game Development Opportunities

With libraries like **Pygame**, you can design fun and interactive games. It's a creative way to learn coding logic while having fun.

8. Automation & Productivity Powerhouse

Python automates boring tasks — from **data entry to emails**. It saves hours of manual work, making you more efficient and productive.

9. Web Development Made Simple

Frameworks like **Django and Flask** make web app creation super easy. Build your own professional website or AI-powered platform in just weeks.

10. High Demand & Great Salary

Python developers are among the **highest-paid professionals** globally. Every major company — from Google to Netflix — is hiring skilled Python experts.

11. Gateway to Research & Innovation

Python is widely used in **scientific computing, healthcare, and deep tech research**. It's not just a coding skill — it's a gateway to innovation.

Course Curriculum

Module 1 – Introduction

1. Python Introduction - Programming Cycle of Python
2. Python IDE
3. Why Python?
4. Good to know
5. Python Syntax compared to other programming languages
6. Python Install

Module 2 – Variables

1. Variables
2. Data type
3. Number
4. string
5. List
6. Tuple
7. Dictionary

Module 3 – Operator

1. Operator -Arithmetic
2. Comparison
3. Assignment
4. Logical
5. Bitwise operator

Module 4 – Decision making - Loops

1. While loop, if loop and nested loop
2. Number type conversion - int(), long(). Float ()
3. Mathematical functions, Random function, Trigonometric function

Module 5 – String

1. Strings- Escape char, String special Operator, String formatting Operator
2. Build in string methods - center(), count(), decode(), encode()

Course Curriculum

Module 6 – List

1. Python List - Accessing values in list, Delete list elements, Indexing slicing & Matrices
2. Built in Function - cmp(), len(), min(), max()

Module 7 – Tuples

1. Tuples - Accessing values in Tuples, Delete Tuples elements , Indexing slicing & Matrices
2. Built in tuples functions - cmp(), len ()

Module 8 – Dictionary

1. Dictionary - Accessing values from dictionary, Deleting and updating elements in Dict.
2. Properties of Dict, Built in Dist functions & Methods.
3. Date & time -Time Tuple, calendar module and time module

Module 09 – Python Program Flow

1. Indentation
2. The If statement and its' related statement
3. An example with if and it's related statement
4. The while loop
5. The for loop
6. The range statement
7. Break &Continue
8. Assert
9. Examples for looping

Module 10 – Function

1. Function - Define function, Calling function ,First Class Citizen
2. pass by reference as value , Function arguments , Anonymous functions , return statements
3. Scope of variables - local & global

Module 11 – Modules

1. Import statements , Locating modules - current directory , Pythonpath
2. Dir() function , global and location functions and reload () functions .
3. Packages in Python

Course Curriculum

Module 12– Files

1. Files in Python- Reading keyboard input , input function
2. Opening and closing files. Syntax and list of modes
3. Files object attribute- open, close. Reading and writing files, file Position.
4. Renaming and deleting files

Module 13 – Directories

1. mkdir method, chdir () method , getcwd method , rm dir

Module 13 – Directories

1. Exception handling - List of exceptions - Try and exception
2. Try- finally clause and user defined exceptions

Module 14 – OOPs (IMPORTANT)

1. OOP concepts, class, objects, Inheritance, Polymorphisms
2. Overriding methods like _init, Overloading operators , Data hiding & Magic Methods

Module 15 – Framework

1. Introduction to Fast API
2. Overview
3. Environment
4. Apps life cycle
5. Creating views
6. Application

Module 16 –Libraries(Data Science & ML)

1. Scikit-Learn
2. Pandas
3. Numpy
4. Requests
5. Matplotlib

Module 17 – Tools

1. AI Tools (Prompt Engineering , Copilot , Claude)
2. GitHub
3. Clouds
4. 50 + Real World Problems (Leetcode)

Explore the hidden features, advanced concepts, and powerful tricks of Python programming, along with a clear understanding of when and how to use each module and package effectively.

Course Certification

CERTIFICATE OF COMPLETION

THIS CERTIFICATE IS PROUDLY PRESENTED TO

Sanidhya Mishra

ADVANCED PYTHON PROGRAMMING WITH AI

Awarded in recognition of dedication, skill, and
excellence in mastering Python programming concepts.
